

eta Warranties

Independence and neutrality

A neutral, manufacturer- and energy-supplier-independent consultancy secures macro-economically optimized solutions.

Experience and experts' knowledge

Our team of experts has been working on energy projects for more than 20 years. You benefit from the collective know-how in finding the solutions to your problems.

Client-specific solutions

In search of solutions and during the concept development, we do not provide commonplace standard approaches. We specifically work on your particular problem.

Quality and sustainability

Our experts have undergone top-level technical trainings and continue to take part in qualifications. Therefore we can guarantee a diligent and qualified project management, according to state of the art technology and the latest legislation and guidelines. We always follow a holistic and sustainable approach.

Safety and reliability

The confidential treatment of all project-related data and information is a given at eta Energieberatung GmbH, which we will gladly confirm in a written NDA.

Transparency and coordination

Fair and cooperative dealings are essential for optimized solutions. Therefore we rely on transparency and communication, starting with the joint definition of framework conditions to regular project meetings to coordinated recommendations in the final presentation of the results.

Consultancy and complete solutions

Our consultancy covers all areas of energy supply and usage, from energy purchase to power generation and application, to the procurement of subsidies. Our experts are at your side, from the initial project idea to its implementation and beyond.

Guaranteed savings

Thanks to many years of consulting experience, we can guarantee that we will find saving potentials also in your company. For the more than 1000 customers advised by us, the average savings achieved were 5 to 6 %.
